YAMAMA's contracting operates nationwide across the Kuwait. In addition to building contracting, we also extend our services to the critical woodwork and gypsum works. With scores of successfully completed projects we are able to take on turn-key solutions and offer advice on procurement methods most suitable to the project.

We Deliver from Planning to Finishing

Our experienced team of engineers and various specialists are trained to thoroughly understand the objectives of the client and deliver within budget and on schedule. The diverse nature of our completed projects is a reflection of our long years in the business and our ability to stay committed in challenging situations.

The front line team invests a great deal of time and effort in understanding requirements prior to the building exercise; this translates into efficient undertaking of all the details and help plan accurately.

YAMAMA management has invested heavily in building resources – this is the key aspect of our success as even complex projects appear to be executed with ease, thanks to the massive resources that is deployed for each structure. YAMAMA Building Contracting is built on a strong foundation of highly ethical business practices & has added commitment and drive over the last 23 years to achieve the present day success.

Industry Expertise :

Over the years, we have emerged out as a pioneer name in the industry. Our honesty, ethics and a desire for continuous improvement enables us in establishing ourselves in a much

better manner. With our strong industry experience and superior business practices, we are able to meet with all the demands of Manpower. Our dedication towards building genuine, long term relationships results in professional business environment wherein the clients and candidates flourish.

Construction Management :

Our construction management philosophy focuses on developing an interactive, inclusive working relationship among the client, the design firms, and the construction team. We begin the management process immediately upon award and remain your partner until the project is complete, the building or water/wastewater treatment facility is fully operational and all members of the team are satisfied. We provide construction management services in two phases: preconstruction and con-

struction. Meaningful preconstruction services bring value, potential cost savings, and informed decision-making to the client while eliminating surprises to provide you with a predictable outcome. During the value analysis process we think outside the box to achieve your goals with your budget and project needs in mind. Early involvement of the construction team benefits every aspect of the project. During the preconstruction phase, we provide planning and scheduling, estimating, value engineering and constructability reviews, purchase long-lead items, develop and monitor the budget, and prequalify subcontractors. During the construction phase, we buy all required material, subcontractor services, build your facility, and ensure your facility is fully operational. The success of this approach relies on the continuity of the team from preconstruction through construction.

YAMAMA Petrochemical Equip- ment and Services

Petrochemical Equipment and Services

YAMAMA possesses the necessary abilities, references for the provision of supplies of petrochemical products such as white spirit, used engine oil and have established connections with the suppliers of other petroleum products. YAMAMA TRANSPORTATION, LOGISTICS & EQUIPMENT RENTAL SERVICES

TRANSPORTATION, LOGISTICS & EQUIPMENT RENTAL SERVICES

YAMAMA Logistic Services specializes in providing quality third party transportation management solutions to shippers that want to achieve greater efficiencies within their supply chain. Through a combination of our people, technology and processes we have the ability to generate measurable results for our customers.

Cloud-based solutions for freight brokerage, supply chain management, GPS fleet tracking, route planning, transportation management and global trade compliance.

Whether you are global or local, asset or non-asset based, move shipments by air, ocean, ground or any combination in-between, the challenge for transportation and logistics service providers is to offer differentiated service at a com-

petitive price. This is easier said than done, as you have to manage shipments, resources and documents that are all concurrently in motion with business processes that extend to the edge of your enterprise and well into your trading partners' and customers' operations. Working with trading partners can also be a challenge because they are numerous and your relationships with them are constantly changing.

With thousands of customers just like you, Descartes understands your situation and has a portfolio of supply chain software and domain expertise unique to the transportation and logistics services markets. The breadth and depth of capabilities we can provide you through our Logistics Technology Platform are unparalleled in the market – including:

- contract management
- purchased transportation management
- regulatory compliance
- route planning, delivery scheduling and fleet management
- forwarder and broker solutions
- trading partner connectivity
